

VictoryShares USAA MSCI International Value Momentum ETF

QUARTERLY COMMENTARY • Q4 // December 31, 2020

VICTORYSHARES USAA MSCI INTERNATIONAL VALUE MOMENTUM ETF COMPARED TO THE MSCI WORLD EX USA INDEX

Investment Strategy

The VictoryShares USAA MSCI International Value Momentum ETF (UIVM) offers broad international equity exposure using a risk-weighted multi-factor strategy. The Fund seeks investment results that track the performance of the MSCI World ex USA Select Value Momentum Blend Index before fees and expenses.

UIVM utilizes a multi-factor strategy that seeks higher exposure to *value* and *momentum* factors, with the objective of delivering long-term excess risk-adjusted returns. The Fund targets a balanced risk contribution from the stocks in the portfolio by weighting stocks according to their volatility.

VictoryShares Update

In the fourth quarter of 2020, VictoryShares continued to focus on rules-based solutions that seek to bridge the gap between active and passive management while delivering consistent outcomes for clients. At the end of the quarter VictoryShares had \$5.6 billion in assets under management, including \$419 million in UIVM.

Performance Update

UIVM was up 13.77% in the quarter, underperforming the MSCI World ex USA Index (the "Index"), which was up 15.85%. It was generally not a favorable environment for UIVM's multi-factor approach during the quarter relative to the cap-weighted Index.

Top Contributors

The top stock contributors to UIVM's relative performance versus the Index were underweights to Nestle, -1%; SAP SE, -16%; and AstraZeneca, -8%.

An underweight to the Health Care sector, +4%, contributed to relative performance.

An underweight to Switzerland, +8%, contributed to relative performance during the quarter.

Top Detractors

The largest stock detractors from UIVM's relative performance were overweights to Metro Inc., -6%; Loblaw Companies Limited, -5%; and Kingspan Group Plc, -8%.

An underweight to the Financials sector, +25%, detracted from relative performance.

An overweight to Australia, +23%, detracted from relative performance during the quarter.

Past performance does not guarantee future results. The performance data quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.victoryshares.com. ETF shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will

reduce returns. Market price returns are based on the price of the last reported trade on the Fund's primary exchange. If you trade your shares at another time, your return may differ. Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Fee waivers and/or expense reimbursements were in place for some or all periods shown, without which Fund performance would have been lower. Index performance is shown for illustrative purposes only. Indexes are unmanaged and one cannot invest directly in an index.

Carefully consider a fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus or summary prospectus containing this and other important information, visit www.vcm.com/prospectus. Read it carefully before investing.

All investing involves risk, including the potential loss of principal. The Fund has the same risks as the underlying securities traded on the exchange throughout the day. Redemptions are limited, and commissions are often charged on each trade. ETFs may trade at a premium or discount to their net asset value. The Fund invests in securities included in, or representative of securities included in, the Index, regardless of their investment merits. The performance of the Fund may diverge from that of the Index. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Investments concentrated in a single country, a small number of countries or a specific region typically exhibit higher volatility. Investments in mid-cap companies typically exhibit higher volatility. Derivatives may not work as intended and may result in losses. The value of your investment is also subject to geopolitical risks such as wars, terrorism, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies. Momentum investing may be more volatile than other investments. Momentum can turn quickly and the Fund may experience significant losses if momentum stops, turns or behaves differently than predicted. Fund holdings and sector allocations are subject to change, may differ from the Index, and should not be considered investment advice.

Market capitalization is the total dollar value of all outstanding shares computed as number of shares times current market price.

Market price is the price of the last reported trade on a fund's primary exchange.

Net asset value or **NAV** is a fund's total assets minus its total liabilities, divided by the number of outstanding shares.

Premium/discount % indicates whether an ETF is currently trading at a higher or lower

price than the current value of the securities in that portfolio.

The **MSCI World ex USA Select Value Momentum Blend Index** is based on the MSCI World ex USA (its parent index) and includes large- and mid-cap stocks across developed markets, excluding the United States. The index is designed to provide higher exposure to value and momentum factors within the parent index while also maintaining moderate index turnover and lower realized volatility than traditional cap-weighted indexes.

The **MSCI World ex USA Index** captures large- and mid-cap stocks across the developed markets, excluding the United States. The index covers approximately 85% of the free-float-adjusted market capitalization in each country.

Net expense ratio reflects the contractual waiver and/or reimbursement of management fees through June 30, 2021.
