

VictoryShares USAA[®] MSCI USA Value Momentum ETF

QUARTERLY COMMENTARY • Q4 // December 31, 2020

VICTORYSHARES USAA MSCI USA VALUE MOMENTUM ETF COMPARED TO THE MSCI USA INDEX

Investment Strategy

The VictoryShares USAA MSCI USA Value Momentum ETF (ULVM) offers broad U.S. large-cap and mid-cap equity market exposure using a risk-weighted, multi-factor strategy. The Fund seeks investment results that track the performance of the MSCI USA Select Value Momentum Blend Index before fees and expenses.

ULVM utilizes a multi-factor strategy that seeks higher exposure to *value* and *momentum* factors, with the objective of delivering long-term excess risk-adjusted returns. The Fund targets a balanced risk contribution from the stocks in the portfolio by weighting stocks according to their volatility.

VictoryShares Update

In the fourth quarter of 2020, VictoryShares continued to focus on rules-based solutions that seek to bridge the gap between active and passive management while delivering consistent outcomes for clients. At the end of the quarter VictoryShares had \$5.6 billion in assets under management, including \$508 million in ULVM.

Performance Update

ULVM was up 14.20% in the quarter, outperforming the MSCI USA Index, which was up 13.15%. It was a generally favorable environment for ULVM's multi-factor approach during the quarter relative to the cap-weighted Index.

Top Contributors

The largest stock contributors to ULVM's relative performance versus the Index were underweights to Amazon, +3%, and Microsoft, +6%. An overweight to Tesla, +64%, was also a large contributor.

An overweight to the Industrials sector, +15%, contributed to relative performance.

Top Detractors

The largest stock detractor to ULVM's relative performance versus the Index was an overweight to Zoom Video Communications, -28%, and underweights to Walt Disney, +46%, and JPMorgan Chase, +33%.

An overweight to the Real Estate sector, +5%, detracted from relative performance.

Past performance does not guarantee future results. The performance data quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.victoryshares.com. ETF shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will

reduce returns. Market price returns are based on the price of the last reported trade on the Fund's primary exchange. If you trade your shares at another time, your return may differ. Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Fee waivers and/or expense reimbursements were in place for some or all periods shown, without which Fund performance would have been lower. Index performance is shown for illustrative purposes only. Indexes are unmanaged and one cannot invest directly in an index.

Carefully consider a fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus or summary prospectus containing this and other important information, visit www.vcm.com/prospectus. Read it carefully before investing.

All investing involves risk, including the potential loss of principal. The Fund has the same risks as the underlying securities traded on the exchange throughout the day. Redemptions are limited, and commissions are often charged on each trade. ETFs may trade at a premium or discount to their net asset value. The Fund invests in securities included in, or representative of securities included in, the Index, regardless of their investment merits. The performance of the Fund may diverge from that of the Index. Investments concentrated in a single country, a small number of countries or a specific region typically exhibit higher volatility. Investments in mid-cap companies typically exhibit higher volatility. Derivatives may not work as intended and may result in losses. The value of your investment is also subject to geopolitical risks such as wars, terrorism, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies. Momentum investing may be more volatile than other investments. Momentum can turn quickly and the Fund may experience significant losses if momentum stops, turns or behaves differently than predicted. Fund holdings and sector allocations are subject to change, may differ from the Index, and should not be considered investment advice.

Market capitalization is the total dollar value of all outstanding shares computed as number of shares times current market price.

Market price is the price of the last reported trade on a fund's primary exchange.

Net asset value or **NAV** is a fund's total assets minus its total liabilities, divided by the number of outstanding shares.

Premium/discount % indicates whether an ETF is currently trading at a higher or lower price than the current value of the securities in that portfolio.

The **MSCI USA Index** is designed to measure the performance of the large- and mid-cap segments of the U.S. market. The index covers approximately 85% of the free-float-adjusted market capitalization in the U.S.

The **MSCI USA Select Value Momentum Blend Index** is based on the MSCI USA Index (its parent index) and includes large- and mid-cap U.S. stocks. The index is designed to provide higher exposure to value and momentum factors within the parent index while also maintaining moderate index turnover and lower realized volatility than traditional market-capitalization-weighted indexes.

Net expense ratio reflects the contractual waiver and/or reimbursement of management fees through June 30, 2021.
