

As of October 27, 2021

Offers corporate bond fund exposure that seeks high current income without undue risk to principal. Invests primarily in investment-grade securities.

Invests in securities of issuers that demonstrate strong or improving Environmental, Social and Governance (“ESG”) characteristics.

Why UCRD?

- Seeks above average income through a yield focused portfolio built bond-by-bond, using fundamental bottom-up analysis
- Actively managed by an experienced taxable fixed income team
- Independent research allows for a differentiated, deeper understanding of credit risk
- Proprietary ESG rating methodology is included as a qualitative component of a securities credit rating

Portfolio Managers

Past performance does not guarantee future results. The performance data quoted represents past performance and current performance may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month-end, visit www.victoryshares.com. ETF shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Market price returns are

based on the price of the last reported trade on the Fund's primary exchange. If you trade your shares at another time, your return may differ. Returns include reinvestment of dividends and capital gains. Performance for periods greater than one year is annualized. Fee waivers and/or expense reimbursements were in place for some or all periods shown, without which Fund performance would have been lower. Index performance is shown for illustrative purposes only. Indexes are unmanaged and one cannot invest directly in an index.

CREDIT QUALITY (%)
Bloomberg U.S. Corporate Bond Index

AAA	2.96	1.50
AA	10.17	9.42
A	34.95	43.69
BBB	50.74	45.31
<BBB	1.17	0.08
Unrated	0.00	0.00

The credit quality chart reflects the highest long-term rating from a Nationally Recognized Statistical Rating Organization (NRSRO), with the four highest long-term credit ratings labeled, in descending order of credit quality, AAA, AA, A and BBB. These categories represent investment-grade quality. Nationally Recognized Statistical Rating Organization (NRSRO) that provide ratings used here are Standard & Poor's, Moody's Investors Service, and Fitch Ratings apply to the credit worthiness of the issuers of the underlying securities and not to the fund or its shares. Ratings are subject to change.

EFFECTIVE DURATION (%)

Carefully consider a fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus or summary prospectus containing this and other important information, visit www.vcm.com/prospectus. Read it carefully before investing.

All investing involves risk, including the potential loss of principal.

The Fund has the same risks as the underlying securities traded on the exchange throughout the day. Redemptions are limited, and commissions are often charged on each trade. ETFs may trade at a premium or discount to their net asset value. Fixed income securities are subject to interest rate, inflation, credit and default risk. The bond market is volatile. Bonds and bond funds will decrease in value as interest rates rise and vice versa. Credit risk refers to the possibility that debt issuers may not be able to make principal and interest payments or may have their debt downgraded by ratings agencies. The value of your investment is also subject to geopolitical risks such as wars, terrorism, environmental disasters, and public health crises; the risk of technology malfunctions or disruptions; and the responses to such events by governments and/or individual companies. The Adviser's integration of responsible investing or ESG considerations may result in the Fund forgoing some market opportunities available to funds that do not apply such considerations. Responsible investing considerations may be linked to long-term rather than short-term returns.

ESG investing is defined as utilizing environmental, social and governance (ESG) criteria as a set of standards for a company's operations that socially conscious investors use to screen potential investments.

Average effective duration is a duration calculation for bonds that have embedded options. This measure of duration takes into account the fact that expected cash flows will fluctuate as interest rates change and is, therefore, a measure of risk.

Duration is a weighted average of the maturity of all income streams from a bond or portfolio of bonds. Generally, the higher the duration, the more sensitive the bond or bond portfolio to changes in interest rates.

Market capitalization is the total dollar value of all outstanding shares computed as number of shares times current market price.

Market price is the price of the last reported trade on a fund's primary exchange.

Net asset value or NAV is a fund's total assets minus its total liabilities, divided by the number of outstanding shares.

Premium/discount % indicates whether an ETF is currently trading at a higher or lower price than the current value of the securities in that portfolio.

Credit quality ratings are obtained using Bloomberg Barclays methodology using ratings derived from Moody's Investors Service (Moody's), Standard & Poor's (S&P) and Fitch Ratings (Fitch). When ratings from all three agencies are available, the median rating is used. When ratings are available from two of the agencies, the lower rating is used. When one rating is available, that rating is used. Victory Capital Management does not evaluate these ratings but simply assigns the to the appropriate credit quality category as determined by the rating agency.

Subsidized yield reflects fee waivers/reimbursements/limits in effect.

30 Day SEC yield is a standard yield calculation developed by the SEC for bond funds. The yield is calculated by dividing the net investment income per share earned during the 30-day period by the maximum offering price per share on the last day of the period. The yield figure reflects the dividends and interest earned during the 30-day period, after the deduction of the fund's expenses. It is sometimes referred to as "SEC 30-Day Yield" or "Standardized Yield."

The Bloomberg U.S. Corporate Bond Index (BBG US Corporate) measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD denominated securities publicly issued by US and non-US industrial, utility and financial issuers.

Net expense ratio reflects the contractual waiver and/or reimbursement of management fees through October 31, 2022.
