The RS Concentrated All Cap Composite invests principally in a concentrated portfolio of equity securities of companies that RS Investments believes are undervalued, and may at times invest a portion of its assets in non-US securities. The benchmark is the Russell 3000 Value Index. The composite was created in July 2005.

The Russell 3000[®] Index is a market-capitalization-weighted index that measures the performance of the 3,000 largest U.S. stocks by market capitalization and covers 98% of the investable U.S. equity universe. A Fund's portfolio differs significantly from the securities held in an index. An index is unmanaged and not available for direct investment.

Index returns are provided to represent the investment environment during the periods shown. Index performance does not reflect management fees, transaction costs or expenses that would be incurred with an investment. One cannot invest directly in an index. **Past performance does not guarantee future results.**
